"You can do what I cannot do. I can
do what you cannot do.

TOGETHER, we can do great
things."

Mother TheresaTogether

WHY does it all matter?

Objectives

- **Raise awareness on hot topics impacting our profession.**
- **Identify opportunities to upskill and fulfill knowledge gaps to SHINE in your sphere of influence.**
- **Encourage reflection specific to influencing, life learning, and volunteering.**

Trends IMPACTING Industry

Technology

**Artificial
Intelligence**

Data Analytics

**Robotic Process
Automation**

CyberSecurity

4

**How comfortable are you with
any one of these?**

Complex problem solving			

It is YOUR Time to SHINE and ADD VALUE to ANY organization

Where are you going to be in 10 years?

Technology is here, artificial intelligence is here, and data analytics is here; are you ready? Are you shining?

DISRUPTORS

PwC – 1/3 of U.K jobs at risk of automation by 2030; Robots could take over 38% of current U.S. jobs in the next 15 years.

Technology in Healthcare

- The pandemic jumpstarted digitally-enabled care, particularly in telemedicine and virtual health delivery - \$15 to \$25 billion annually
- Administration: simplifying digital access and patient self-scheduling, optimizing patient portals, using AI for nurse staffing and scheduling and to triage patients to the right venue of care
- Treatments: Computer-aided artificial intelligence, telemedicine, remote patient monitoring, digital therapeutics, augmented reality for chronic pain treatment

Paradigm Shifts

AI, Robots,
Automation

History is on our side.....

Technology creates more jobs than it destroys, BUT it also leads to employment shifts

Technology

Benefits and Challenges

Enhanced Efficiency and productivity
Cost reduction
Profit boost

Artificial Intelligence/Machine Learning

AI is a type of computer technology that makes machines "smart." It helps machines perform tasks with human-like intelligence.

Robots

Entrepreneurship MindSet

Humanics

Revenue Cycle Management

Ethics

Microsoft Fabric

Interoperability/Transparency

Are you embracing technology?

AI and Ethics

AI ethically involves ensuring that the project respects privacy, maintains data security, complies with regulations, and prioritizes the well-being and informed consent of individuals.

Balances of Interest and Values

Promotes Responsibility and Accountability

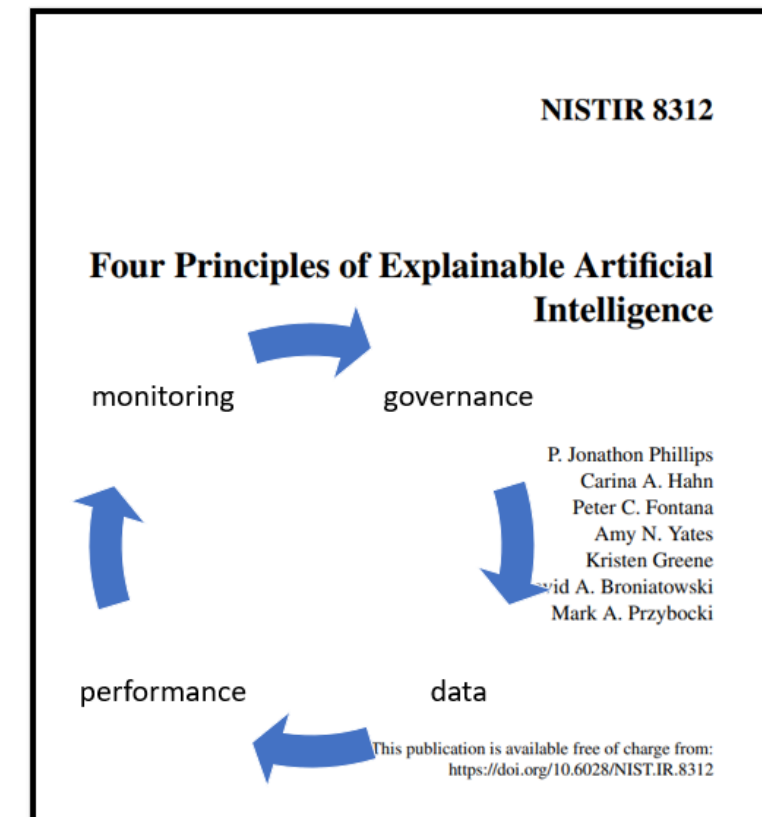

Ensures fairness and justice

Enhances Public Trust

Mitigates Harm

Adapts to Technological Advancements

Uniting experts: Fed Govt, Industry, Non-profit sectors

Top AI Ethics Issues

Privacy and Surveillance

Role of Human Judgment

Human interaction and behavior

Lack of transparency

Bias and discrimination

Legal responsibility

AI Errors

Technology reliance

Unemployment

Environmental Concerns

Misuse of AI

Bias and Discrimination

Leaders, Business Owners, Managers, Workers...the questions to ask

Are you paying attention to the foundation and solidifying your current technology, to be able to grow?

What was the half life of a skill a generation ago???

Are you asking questions and exploring ways to disrupt “business as usual” through new technology?

By 2030, 55% MORE time using technical skills than in 2016. Will there be a net gain in employment through automation?

Are you budgeting for innovation?

Are you taking active steps to harness the staggering power of technology?

Are you having the conversations, pursuing the knowledge, and doing what you can to position your organization to ride the growth of technology?

Reflection #1 - AI, Humanics, ChatGPT

3 TOP Countries
Who are they?

AI

Jobs are now requiring experience with ChatGPT — and they'll pay as much as...

CBS News + Follow

Lawyers fined for filing bogus case law created by ChatGPT

Story by CBSNews • Yesterday 11:44 AM

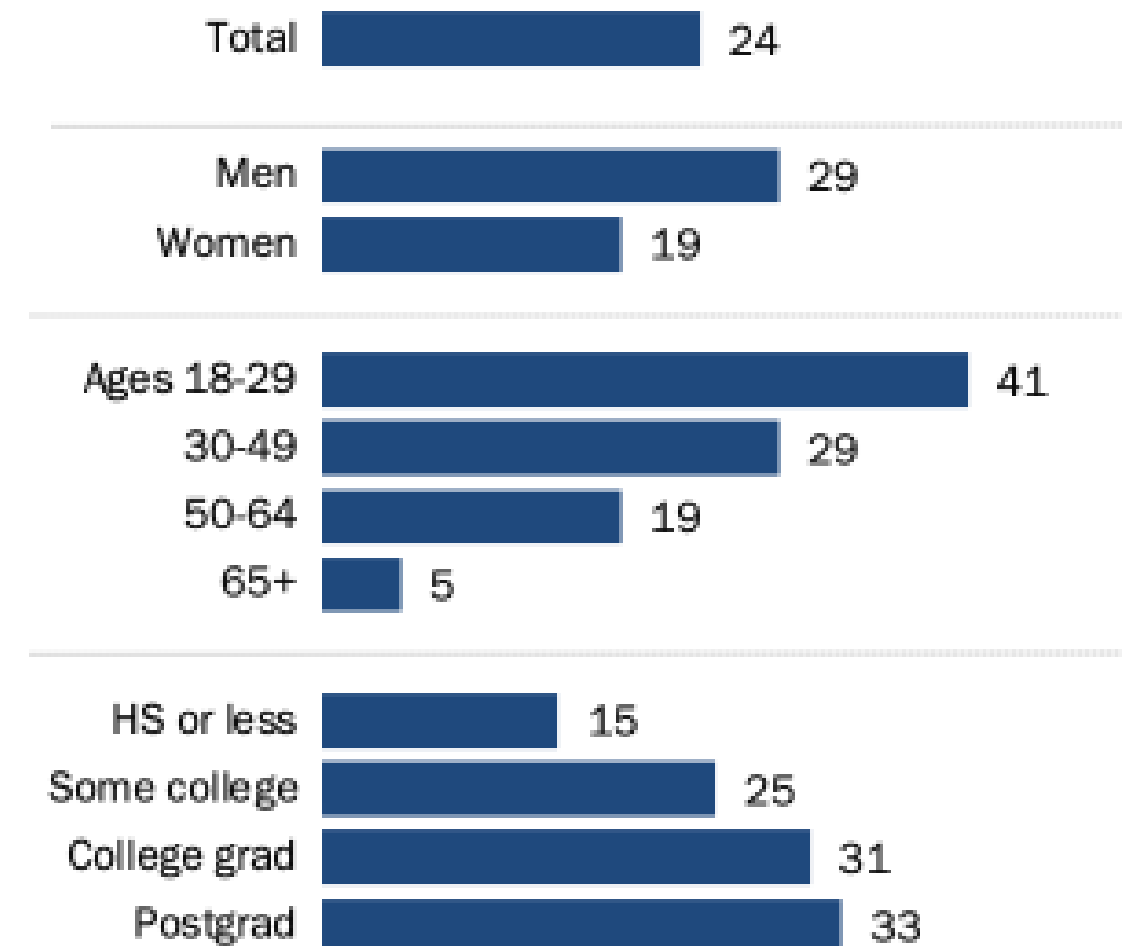

A consultant used ChatGPT to free up time so she could focus on pitching clients. She landed \$128,000 worth of new contracts in just 3 months.

Reflection #1 – AI, Humanics, ChatGPT

ChatGPT use in the U.S. varies widely by age and education

Among U.S. adults who have heard of ChatGPT, % who say they have ever used it

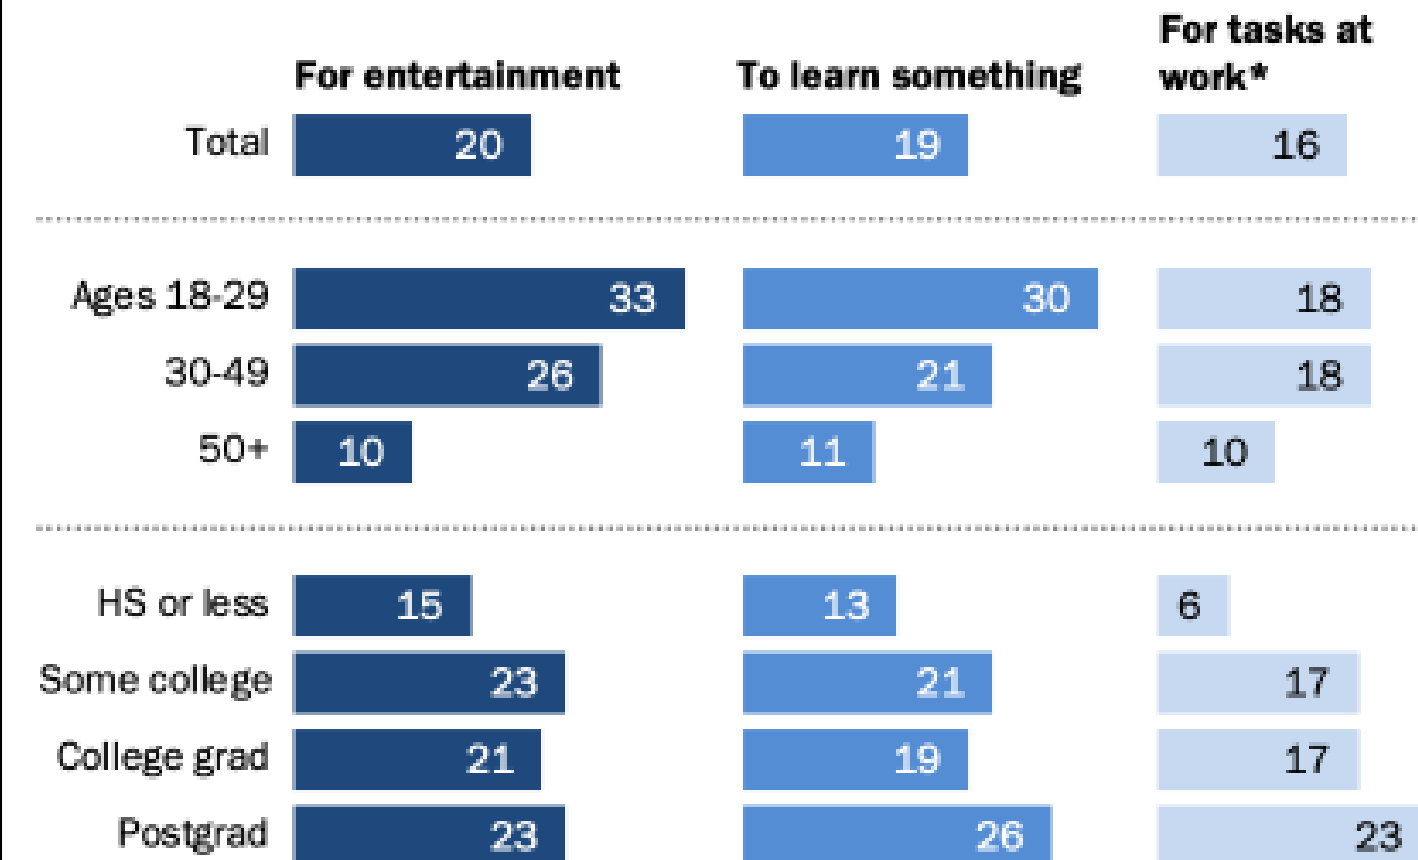

Note: All percentages are based on those who have heard of ChatGPT. Those who did not give an answer are not shown.

Source: Survey of U.S. adults conducted July 17-23, 2023.

PEW RESEARCH CENTER

Younger adults who have heard of ChatGPT are more likely than their older peers to have used it for entertainment or education

Among U.S. adults who have heard of ChatGPT, % who say they have ever used it ...

* Based on those who were working full or part time for pay at the time of the survey and have heard of ChatGPT.

Note: All percentages are based on those who have heard of ChatGPT. Those who did not give an answer are not shown.

Source: Survey of U.S. adults conducted July 17-23, 2023.

PEW RESEARCH CENTER

What is machine learning in the “real world”?

Applications of ML

Reflection #2 – Robots

Genetic testing, robotic surgery, cancer research, cancer detection/research

Challenges – data access, bias, scaling and integration, lack of transparency, privacy, uncertainty over liability

HealthCare Robotics

- 
- “Robots are not going to spell the end of the human race, BUT *AI technology has the potential to transform the labor market by eliminating some jobs, creating new jobs, and making most jobs better.*”

Jobs will
change and
they will
change for the
better.....are
you ready?

Exhibit 1 - Methodology to Project Workforce Supply and Demand in 2030

Categorizing jobs

Job family groups encompass similar occupations and represent the first level of categorization. They include, for example:

- Production occupations
- Business and financial operations occupations

Job families represent the second level of categorization, such as:

- Metal and plastic workers
- Financial specialists

	Number of job family groups	Number of job families
US	22	93
Germany	22	86
Australia	22	82

Workforce supply

Total available workforce split by job family and age

- Working population (including regular employees, self-employed people, and civil servants)
- Unemployed population

Entries into workforce

- + Graduates from education system
- + Net migration

Exits from workforce

- Retirement
- Mortality

Workforce demand

Total workforce demand split by job family and year

- Working population (including regular employees, self-employed people, and civil servants)
- Open positions

Job creation

- + Additions due to technology
- + Nontech job gains due to economic growth

Job reductions

- Automation
- Augmentation-based efficiency increases

Sources: Faethm; BCG analysis.

Note: All national-level data drawn from federal statistics offices.

How will AI impact Careers?

Gap between workforce supply and demand (thousands of FTEs)

Gap in current supply (%)
Cumulative shortfall -50% Cumulative surplus +50%

Ankit Kumar • 3rd+
5h •

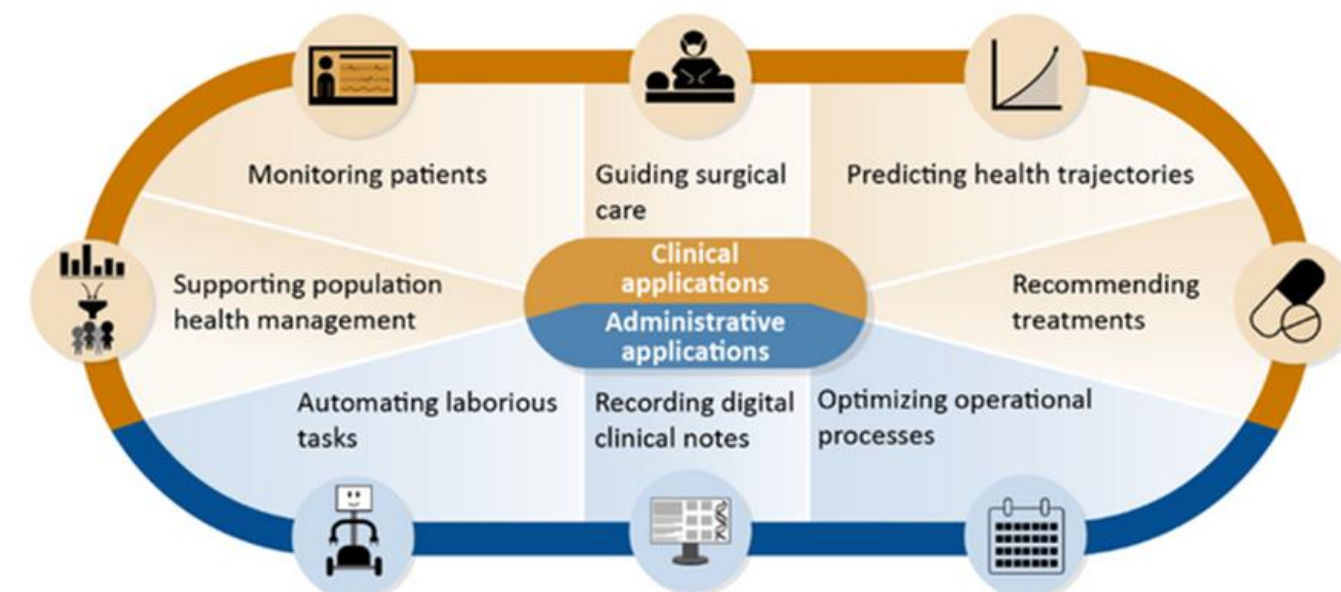

Virtual reality (VR) and Internet of Things (IoT) devices are transforming the healthcare industry in many ways. One of the most exciting applications is the use of VR and IoT to help patients relax and reduce stress.

These technologies are transforming the patient experience, promoting relaxation, and reshaping the future of healthcare.

Check out this blog to know in detail how these technology impacting healthcare industry
